

SCIENCE YEAR-I

Animals Including Humans

- Identify and classify different types of animals.
- Learn basic parts of the human body.
- Compare human body parts with those of various animals.
- Explore different animal habitats.

Everyday Materials

- Identify common materials (wood, plastic, metal, etc.).
- Describe properties of materials (hard, soft, rough, smooth).
- Investigate how materials behave under different conditions.
- Understand the importance of recycling.

Seasonal Changes

- Identify the four seasons and their characteristics.
- Learn how weather changes with the seasons.
- Explore activities and holidays associated with each season.
- Make observations about seasonal changes in the local environment.

Introduction to the Solar System

- Learn about the Sun, Moon, and planets in our Solar System.
- Understand the basic concept of day and night.
- Explore the importance of the Sun for life on Earth.
- Foster curiosity about space and astronomy.
